(54) METHOD AND DEVICE FOR EVALUATING ENVIRONMENTAL LOAD

(57)Abstract:

PROBLEM TO BE SOLVED: To easily set up the registering procedure of environmental load(EL) information collected for the evaluation of EL.

SOLUTION: An EL evaluating device is constituted of an EL evaluating unit 10 provided with a retrieving condition input part 11, an EL information retrieving part 12, an EL evaluating part 13, and an output part 14 and an EL information storing unit 20 provided with an EL information input part 21 and an EL information storing part 22. Both the units 10, 20 are separated from each other and the unit 20 is distributively arranged on an EL information collecting place such as a manufacturing line of a product to be evaluated. The retrieving part 12 retrieves information stored in the storing part 22 built in the unit 20.
